Work Experience

Packages Limited

React & React Native Developer Intern

Lahore, Pakistan

August 2026 – September 2026

- Developing a gamified cybersecurity-awareness web platform for aspiring cybersecurity learners, featuring avatar customization, a live leaderboard, a **1,000-question adaptive MCQ bank**, timed 1v1 challenges.
- Building a React Native incident-reporting mobile application with a **Node.js/Express and MongoDB** backend, implementing role-based routing and dashboards for Reporters and Location Managers.

Galixo.ai

Android Developer Intern

Bahria Town, Islamabad, Pakistan

July 2026 – August 2026

- Completed a hands-on Android development internship, building proficiency in **Kotlin, XML-based UI design, and Jetpack Compose**.
- Gained practical exposure to native Android app architecture and modern declarative UI patterns using Jetpack Compose.

Divine Bits (Pvt) Ltd

ML & AI Engineer Intern

Islamabad, Pakistan

July 2025 – October 2025

- Built an end-to-end AI-powered recipe recommendation platform using a dataset of **23,500+ recipes**, recommending recipes based on available ingredients or target cuisine.
- Implemented ingredient-based and cuisine-based recommenders using **TF-IDF, Nearest Neighbors, and Cosine Similarity**.
- Integrated a **YOLOv8 model achieving 58.5% mAP@50** for image-based ingredient detection and deployed the platform as an interactive Streamlit web app.

OntriggerJoy Inc.

Game Developer Intern

Islamabad, Pakistan

July 2024 – October 2024

- Contributed to the development of **2D and 3D games** using Unity and C#, focusing on gameplay mechanics, UI, and performance optimization.
- Collaborated with an agile team using Git for version control and smooth development workflow.

Academic Projects

Hyper-Local Disaster & Safety Network (HLDSN)

Java, Firebase, P2P Mesh

Final Year Project

- Developed an offline-first mobile application in a **3-person team** enabling resilient P2P communication and emergency coordination when conventional internet infrastructure fails.
- Implemented **Wi-Fi Direct and Bluetooth mesh networking** supporting real-time nearby chat, **1-tap SOS alerts**, and community incident reporting.
- Integrated hazard maps, government disaster alerts, a Safety & First Aid knowledge base, and role-based Firebase Auth dashboards for users, volunteers, and NGOs.

FaceDetectionApp

TensorFlow Lite, Java

Android

- Developed an Android application for managing student attendance using **TensorFlow Lite** for real-time face recognition.

Ghost-Buster

C#, URP

Unity

- Built a dynamic **2D action-platformer** using Unity featuring advanced combat mechanics, strategic enemy AI, and URP-powered environments.

SRE-Homes

MongoDB, Express, ReactJS, NodeJS (MERN)

Full-Stack Web Application

- Developed a full-stack MERN real estate application with a seamless property browsing experience and a robust administrative dashboard for inventory management.

Technical Skills

Languages: Kotlin, Java, JavaScript, C#, Python, C++, PHP

Mobile Development: Android (Jetpack Compose, XML UI), React Native, Firebase, TensorFlow Lite

Frontend: ReactJS, HTML, CSS, Bootstrap, Figma

Backend & Databases: Node.js, Express, Firebase, MongoDB, SQL

ML & Computer Vision: YOLOv8, TF-IDF, Scikit-learn, Streamlit

Tools & Platforms: Android Studio, Git, Unity

Core Concepts: OOP, Data Structures & Algorithms, SOLID Design Principles, Debugging & Testing

Education

Capital University of Science and Technology

Bachelor of Science in Software Engineering

Islamabad, Pakistan

2022 – Present
